POST- DOCTORAL POSITION

Applications are invited for a post-doctoral researcher in the team of Dr. Nadica Ivošević DeNardis, Laboratory for Marine and Atmospheric Biogeochemistry, Division for Marine and Environmental Research, Ruđer Bošković Institute, Zagreb, Croatia.

In the frame of the interdisciplinary research project "From algal cell surface properties to stress markers for aquatic systems", funded by the Croatian Science Foundation, the specific contribution of the post-doctoral researcher will be in the design and characterization of reconstructed plasma membrane vesicles derived from stressed algal cells to lay a foundation for development of bio-inspired carriers for biotechnology applications.

Applicants should have a Ph.D. in chemistry or biology or a related area. The post-doctoral position is for 2 years with the possibility of renewal for an additional 2 years. The position will be posted end of June, 2020.

For more information contact the Nadica Ivošević DeNardis
(ivosevic@irb.hr).
